OBJECTIVES

- Master the approaches and tools to better take into account sustainable development concerns;
- Deepen knowledge on climate change and its associated risks;
- Incorporate mitigation and adaptation measures in national planning and in the design of programmes and projects;
- Master the mechanisms for financing sustainable development.

THE + OF YOUR TRAINING

- - Skills-based approach
- Interactive teaching
- Practical cases, sharing of experiences

CONCERNED AUDIENCE

Environnemental experts

GOOD TO KNOW

Example of a 5 days programme

PEDAGOGICAL PROGRAMME

Module 1

Main environmental and social impact analysis principles

- Basic typology of environmental and social impacts.
- Requirements of the main international donors.
- Analysing and selecting alternatives.
- Defining and programming impact mitigation measures, compensation measures and supporting measures.
- Involving the populations in the decision-making process.
- Developing the Environmental and Social Management Plan (ESMP).
